New York June 29.—Wheat scored a further advance of 4 cents a bushel for July and September in the New York market to-day, advancing respectively 20 85 cents and 87 cents a bushel, to the record prices of the present movement on this crop and the highest price for the year.

Trading continued feverish and excited, and the presence of a strong outside speculative interest was again manifested. The bull interest was in apparent sole centrol and squeezed shorts on the early curb to the extent of practically 2 cents a bushel, July selling up to 25% cents before the regular opening, and at 834,868% cents at the commencement of the regular trading. It was an extremely nervous market throughout, with transactions on a heavy scale and bad crop news, together with unexpect strong English cables.

The cry of dollar wheat has cropped up in some quarters, but the best "talent" regards such a price as extreme under the present conditions.

### ORTSEIFEN'S FRIENDS PICK HIM TO WIN

East St. Louisans Try to Swing St. Clair County Democrats to His Support.

SAY HARRISON FAVORS HIM.

After a Trip to Chicago and North ern Illinois They Feel Confident of Success at Coming Election.

Three East St. Louis Democrats, two them members of the St. Clair County delegation to the Springfield convention and one who carries a proxy, returned last night from a tour of the gubernatorial candidates' headquarters in Chicago.

As a result of their trip they have called a meeting of the St. Clair delegation for Saturday, with the avowed purpose of swinging it for Ortselfen, Chicago's City Treasurer, under the unit rules.

One of the trio-John J. Mumme-was an Ortselfen partisan before starting. Another-Frank B. Bowman-was for Carter Harrison, but returns convinced that the Mayor is not even a receptive candidate and that Ortseifen is the next best man, The third member of the party made his ebut in State politics by this trip.

Here is a composite interview with the three junketers:

"We had heard down here that Mayor Harrison would refuse to accept the nominetion and had thrown all of his strength to his friend, Albert Ortseifen. It was this fact, more than any other, which induced us to make the trip to Chicago. With but very few exceptions the Southern lilinois ielegates to the State Convention favored the nomination of Carter Harrison and they

could not understand how or why he would turn it down when he could get the plum without effort.

"Monday morning we called on Mayor Harrison. He was asked several questions concerning his candidacy and replied:
"I am not a candidate for the guber-"I am not a candidate for the guber-natorial nomination. To accept it would be an injustice to the people of Chicago who elected me their Mayor, as for several menths after the election the Council which is Republican, would have a Mayor pro tem. from one of their crowd. Local reasons solely influenced me in this decision and I have saked my friends to support Mr. Ort-selfen. He is an honest, upright business man, who has risen to his present position in both commercial and political circles by

sheer pluck and hard work."

Frank Wenter, the campaign manager for Mr. Ortselfen, told us of favorable reports from various sections of the State confrom various sections of the State con-cerning the candidacy of Mr. Ortseifen and also touching on the chances for a Dem-ocratic victory in the State this year. Mr. Wenter made the unqualified statement that Ortseifen will be nominated on the first ballot, and that the State will go Demo-cratic. Mr. Wenter has assurance that Cook County, with almost 400 delegates, will come down to Springfield solid for Ortseifen.

Springfield, Ill., June 20.—In the Supreme Court to-day the petition of Corry Miller for a writ of habeas corpus claiming the right to be discharged from the Joliet Penitentiary, where he is confined by Judgment of the Criminal Court of Cook County upon conviction of a misdemeanor in the nature of a conspiracy, was denied.

Miller was indicted Jointly with Charles Warrea and Katherine E. Myers for conspiracy to kill and murder Charles G. Myers. Conspiracy to kill is made a misdemeanor by the statute. The claim was made by Miller's atterneys that he having been sentenced under the indeterminate sentence law he should be discharged for the reason that neither the verdict of the jury nor the judgment of the court fixed the time of his confinement in the penitentiary. The ruling of the Supreme Court in this case is in direct opposition to recent rulings made in Cook County by the Appellate Court of the First District.

rebuilding of the burned district are being formulated, and have progressed far enough to warrant the statement that the new city will far surpass the old.

Every architect in the city is busy on plans. A committee of archiects to-day reported upon the condition of the Courthouse. Their report was such that it is doubtful if the Board of Supervisors will decide to build a new edifice. The Supervisors, to-day, rented Turner Hall for a Courthouse, the lease to run two years, giving ample time to act as they may see fit. The county does not owe a dollar and is one of the wealthest in the West.

The Grieshelm building will be rebuilt at once on the best lines. It will be five stories instead of six, as was the old. It is about decided to erect a half block of four-story buildings south of the alley on the east side of the Courthouse. The owners of the Windsor Hotel site will probably erect a modern hotel, of which the city stands in great hotel. The best estimates place the total loss at £100,000. Total insurance, \$1,500,000.

### WANT MINING BUREAU.

Mine Owners Draw Up a Petition to the Government.

to the Government.

Milwaukee, Wis., June 28.—The question of the permanent organization and incorporation of the International Mining Congress was freely discussed among members at the session of the congress to-day, and the general feeling appears to be that the proposed organization will be defeated.

It is the contention of those in the opposition that unbiased representation cannot be obtained under the proposed system and that the present body will be preserved just as well the way it is.

The fact that an initiation fee will admit all qualified persons to membership will do away with the purely representative character, and the energies of the congress may be directed otherwise than in channels tending to promote the general welfare. At present the congress is made up of unbiased men, coming from recognized mining communities and the object of the gathering is to aid the work.

Resolutions were introduced by Governor Prince providing for a call to Congress to establish a bureau of mining. This is the first open move for this recognition of the mining industry and is the nucleus for wide and extensive campaigning by the mining men of the country to secure a governmental bureau over the art of mining. The resolution says:

"The magnitude and importance of the mining industry, which has now reached over \$60,00,000 of annual product, call for the establishment of a national department of mining, the chief officer of which shall be a member of the Cabinet."

The Chamberlain-Hayes factions passed resolutions providing for the election of a committee of five to examine Mr. Hayes's accounts and report to the order. It is suggested as possible that this step carried out according to the wishes of the Parious faction may settle the matter among the members they represent.

Reader, do you know what real cocos is? To economical housewives and wide-awake people generally, the best cocoa and that of Van Houten are synonymous terms. The cocoa manufactured by that well-known firm is a preparation from the very best cocoa beans, and contains all the valuable nutritive and stimulating properties natural to cocoa. The cocoa-bean contains an alkaloid called "Theobromine," which is the principle of the "cup that cheers, but does not embriate."

The great point of difference between the stimulating properties of alcohol, and that of theobromine is, that the use of the former causes a subsequent depression, which is proportional to the amount of stimulation it has previously brought about; the use of the latter (theobromine) is unattended by such unpleasant aftereffects. Of course, only a first-class cocoa, such as Van Houten's will work in the aforesaid manner. That cocoa has been described as "A triumph of science!" It is absolutely pure, entirely soluble, and easy of assimilation and digestion by the weakest stomach. It costs but a triffe, being less than one cent per cup; and it is the simplest drink to make ready, of the whole catalogue of possible beverages. It smells so good, and tastes so delicious, that when you try it you will cartainly exclaim: "Ahl indeed, it is a triumph of science!"
